EDUCATION

BS Computer Science 2024 - Present

COMSATS University Islamabad

Coursework: OOP, Data Structures, Artificial Intelligence, Computer Networks

Computer Science, Mathematics, Physics A-1 Levels | 2024

Pak-Türk Maarif International Schools & Colleges

Awarded 100% merit scholarship

SKILLS

Programming:

Python, Java, C++, SQL, HTML, JavaFX

Concepts:

OOP, Data structures & algorithms, Software Testing & Development, Database design, NLP and Machine learning fundamentals

Tools:

IntelliJ IDEA, Visual Studio, SQL Server Management Studio

LANGUAGES

- English - Fluent
- Urdu - Native
- Turkish - Basic

ABOUT ME

Computer Science undergraduate with hands-on project experience in machine learning, game development and database design, seeking an internship to gain experience in applying programming and problem solving skills in the real world and contribute meaningfully to a team.

PROJECTS

Dark Deceptive Pattern AI Detector 2026

Python, NLP, Machine Learning

- Built a multi-label classifier to detect dark UX patterns, fake urgency, false scarcity, misleading social proof and misdirection in live webpage text using NLP models.

Space Agency Database System 2026

SQL Database Design

- Designed a fully normalised relational database managing missions, astronauts, spacecraft and launch schedules; enforced referential integrity with foreign key constraints.
- Produced a complete Entity-Relationship diagram documenting the full schema.

Music Player 2025

Java, Data Structures & Algorithms

- Implemented data structures for playlist management with O(1) insert/delete and a stack-based playback history enabling forward/back navigation and shuffle mode.
- Designed an interface using JavaFX, handling edge cases and demonstrating DSA concepts in an everyday application.

Plant Nursery Management System 2025

Java, JavaFX

- Delivered a GUI desktop application for inventory tracking, customer management and point-of-sale transactions, applying OOP principles (encapsulation, inheritance, polymorphism).
- Integrated file handling to retain records across sessions.

Brick Breaker Game 2024

C++, Raylib

- Built a 2D arcade game in C++ with Raylib, implementing delta-time-based ball and paddle physics and circle-rectangle collision detection.
- Implemented a dynamic difficulty system.

CERTIFICATIONS

Cisco CCNA: Introduction to Networks

Cisco Networking Academy

- Foundational knowledge of network protocols, IP addressing, OSI model, routing and switching
